

WYOMING

State's Rank by Arab American Population: **52**
 Census Estimated Arab American Population: **397***

Growth Trends

The population who identified as having Arabic-speaking ancestry in the U.S. Census grew by approximately 10% between 2000 and 2010. The number of Wyomingites who claim an Arab ancestry more than doubled since the Census first measured ethnic origins in 1980 and is among the fastest growing Arab populations in the country. It is estimated that the statewide population, adjusting for under-reporting*, is close to 1,191.

Immigration

The largest number of new Arab immigrants to Wyoming came from Egypt, Kuwait and Jordan.

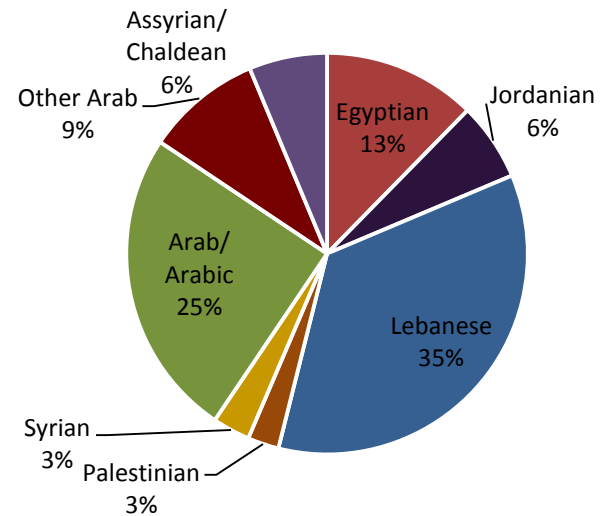

How do Arab Americans Identify Themselves?

Primary Ethnic Identification is derived from responses to the ancestry question on the long (sample) form of the 2010 U.S. Census. Census data on "Arabs" include the responses Lebanese, Syrian, Egyptian, Iraqi, Jordanian, Palestinian, Moroccan, Arab or Arabic, and the following countries collapsed as "Other Arab": Algeria, Bahrain, Djibouti, Kuwait, Libya, Oman, Qatar, Saudi Arabia, Tunisia, the United Arab Emirates, and Yemen.

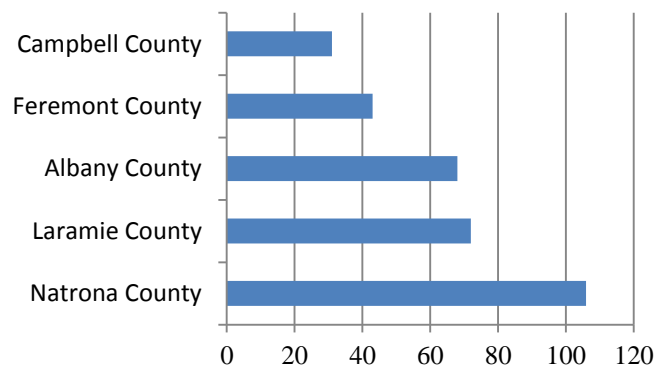

We also include Arabic-speaking persons who identify as Assyrian/Chaldean, Somali or Sudanese, identities which are not aggregated as Arab in Census reports. In Wyoming, according to the 2010 Census, roughly 48% of Arab Americans in the state have Lebanese or Egyptian roots. Since 1990, significant increases appear in the number of Wyomingites who are of Kuwaiti and Jordanian descent. Roughly 25% of ancestry respondents chose the generic identity of "Arab/Arabic."

Where do Wyomingite Arab Americans Live?

Arab Americans in Wyoming reside in 13 of the 23 counties in the state.

Egypt	18
Kuwait	15
Jordan	15
Morocco	7

**Research by AAI and Zogby International suggest that the number above is likely significantly lower than the actual number of Arab Americans in the state. The decennial Census identifies only a portion of the Arab population through a question on "ancestry" on the census long form. Reasons for the undercount include the placement of and limit of the ancestry question (as distinct from race and ethnicity); the effect of the sample methodology on small, unevenly distributed ethnic groups; high levels of out-marriage among the third and fourth generations; and distrust/misunderstanding of government surveys among recent immigrants.*
