

NEW YORK

State's Rank by Arab American Population: **3**
 Census Estimated Arab American Population: **149,729***

Growth Trends

The population who identified as having Arabic-speaking ancestry in the U.S. Census grew by more than 24% between 2000 and 2010. The number of New Yorkers who claim an Arab ancestry more than doubled since the Census first measured ethnic origins in 1980 and is among the fastest growing Arab populations in the country. It is estimated that the statewide population, adjusting for under-reporting*, is close to 449,187.

Immigration

The largest number of new Arab immigrants to New York came from Egypt, Yemen and Morocco.

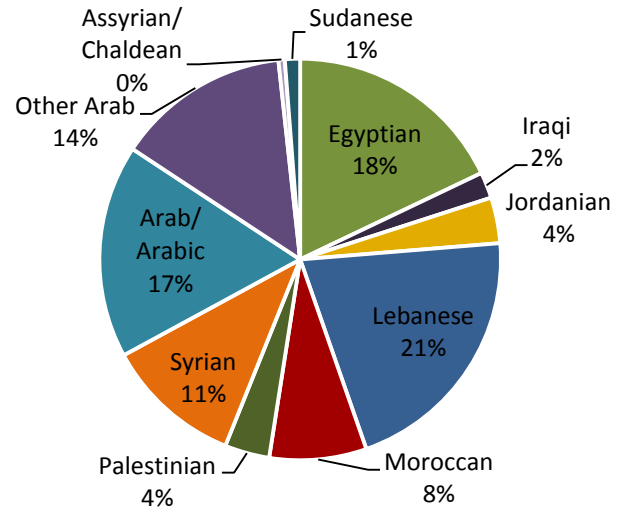

How do Arab Americans Identify Themselves?

Primary Ethnic Identification is derived from responses to the ancestry question on the long (sample) form of the 2010 U.S. Census. Census data on "Arabs" include the responses Lebanese, Syrian, Egyptian, Iraqi, Jordanian, Palestinian, Moroccan, Arab or Arabic, and the following countries collapsed as "Other Arab": Algeria, Bahrain, Djibouti, Kuwait, Libya, Oman, Qatar, Saudi Arabia, Tunisia, the United Arab Emirates, and Yemen.

We also include Arabic-speaking persons who identify as Assyrian/Chaldean, Somali or Sudanese, identities which are not aggregated as Arab in Census reports. In New York, according to the 2010 Census, roughly 21% of Arab Americans in the state have Lebanese roots. Since 1990, significant increases appear in the number of New Yorkers who are of Egyptian and Yemeni descent. Roughly 17% of ancestry respondents chose the generic identity of "Arab/Arabic."

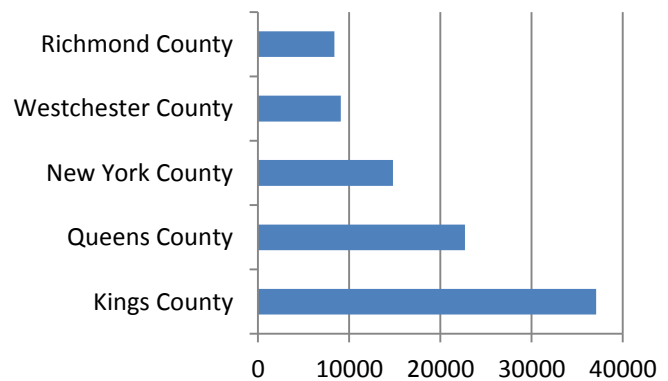

Where do New Yorker Arab Americans Live?

Arab Americans in New York reside in 62 of the 62 counties in the state.

Immigrants by Country of Origin

Egypt	19,477
Yemen	10,539
Morocco	8,838
Lebanon	7,646
Syria	5,531

**Research by AAI and Zogby International suggest that the number above is likely significantly lower than the actual number of Arab Americans in the state. The decennial Census identifies only a portion of the Arab population through a question on "ancestry" on the census long form. Reasons for the undercount include the placement of and limit of the ancestry question (as distinct from race and ethnicity); the effect of the sample methodology on small, unevenly distributed ethnic groups; high levels of out-marriage among the third and fourth generations; and distrust/misunderstanding of government surveys among recent immigrants.*
